October 7, 2009

Report Number: A-04-09-06104

Mr. James Elmore, Director
Contract Administration
National Government Services, Inc.
8115 Knue Road
Indianapolis, Indiana 46250

Dear Mr. Elmore:

Enclosed is the U.S. Department of Health and Human Services (HHS), Office of Inspector General (OIG), final report entitled “Review of Medicare Outpatient Payments for Oxaliplatin in West Virginia.” We will forward a copy of this report to the HHS action official noted on the following page for review and any action deemed necessary.

The HHS action official will make final determination as to actions taken on all matters reported. We request that you respond to this official within 30 days from the date of this letter. Your response should present any comments or additional information that you believe may have a bearing on the final determination.

Pursuant to the Freedom of Information Act, 5 U.S.C. § 552, OIG reports generally are made available to the public to the extent that information in the report is not subject to exemptions in the Act. Accordingly, this report will be posted on the Internet at http://oig.hhs.gov.

If you have any questions or comments about this report, please do not hesitate to call me, or contact Andrew Funtal, Audit Manager, at (404) 562-7762 or through email at Andrew.Funtal@oig.hhs.gov. Please refer to report number A-04-09-06104 in all correspondence.

Sincerely,

/Peter J. Barbera/
Regional Inspector General
for Audit Services

OFFICE OF INSPECTOR GENERAL

REVIEW OF MEDICARE OUTPATIENT PAYMENTS FOR OXALIPLATIN IN WEST VIRGINIA

Daniel R. Levinson
Inspector General

October 2009
A-04-09-06104
The mission of the Office of Inspector General (OIG), as mandated by Public Law 95-452, as amended, is to protect the integrity of the Department of Health and Human Services (HHS) programs, as well as the health and welfare of beneficiaries served by those programs. This statutory mission is carried out through a nationwide network of audits, investigations, and inspections conducted by the following operating components:

**Office of Audit Services**

The Office of Audit Services (OAS) provides auditing services for HHS, either by conducting audits with its own audit resources or by overseeing audit work done by others. Audits examine the performance of HHS programs and/or its grantees and contractors in carrying out their respective responsibilities and are intended to provide independent assessments of HHS programs and operations. These assessments help reduce waste, abuse, and mismanagement and promote economy and efficiency throughout HHS.

**Office of Evaluation and Inspections**

The Office of Evaluation and Inspections (OEI) conducts national evaluations to provide HHS, Congress, and the public with timely, useful, and reliable information on significant issues. These evaluations focus on preventing fraud, waste, or abuse and promoting economy, efficiency, and effectiveness of departmental programs. To promote impact, OEI reports also present practical recommendations for improving program operations.

**Office of Investigations**

The Office of Investigations (OI) conducts criminal, civil, and administrative investigations of fraud and misconduct related to HHS programs, operations, and beneficiaries. With investigators working in all 50 States and the District of Columbia, OI utilizes its resources by actively coordinating with the Department of Justice and other Federal, State, and local law enforcement authorities. The investigative efforts of OI often lead to criminal convictions, administrative sanctions, and/or civil monetary penalties.

**Office of Counsel to the Inspector General**

The Office of Counsel to the Inspector General (OCIG) provides general legal services to OIG, rendering advice and opinions on HHS programs and operations and providing all legal support for OIG’s internal operations. OCIG represents OIG in all civil and administrative fraud and abuse cases involving HHS programs, including False Claims Act, program exclusion, and civil monetary penalty cases. In connection with these cases, OCIG also negotiates and monitors corporate integrity agreements. OCIG renders advisory opinions, issues compliance program guidance, publishes fraud alerts, and provides other guidance to the health care industry concerning the anti-kickback statute and other OIG enforcement authorities.
NOTICES

THIS REPORT IS AVAILABLE TO THE PUBLIC
at http://oig.hhs.gov

Section 8L of the Inspector General Act, 5 U.S.C. App., requires that OIG post its publicly available reports on the OIG Web site.

OFFICE OF AUDIT SERVICES FINDINGS AND OPINIONS

The designation of financial or management practices as questionable, a recommendation for the disallowance of costs incurred or claimed, and any other conclusions and recommendations in this report represent the findings and opinions of OAS. Authorized officials of the HHS operating divisions will make final determination on these matters.
EXECUTIVE SUMMARY

BACKGROUND

Pursuant to Title XVIII of the Social Security Act, the Medicare program provides health insurance for people age 65 and over and those who are disabled or have permanent kidney disease. The Centers for Medicare & Medicaid Services, which administers the program, contracts with fiscal intermediaries to process and pay Medicare Part B claims submitted by hospital outpatient departments. Medicare uses an outpatient prospective payment system to pay for hospital outpatient services.

Oxaliplatin is a chemotherapy drug used to treat colorectal cancer. During our audit period (calendar year (CY) 2005), Medicare required hospital outpatient departments to bill one service unit for every 5 milligrams of oxaliplatin administered.

National Government Services, Inc. (NGS) was the fiscal intermediary for West Virginia in CY 2005. We reviewed 16 payments totaling $489,046 that NGS made to two hospitals in West Virginia. Each of these payments amounted to less than $50,000 for more than 100 units of oxaliplatin.

OBJECTIVE

Our objective was to determine, for selected payments, whether hospitals billed NGS for the correct number of service units of oxaliplatin.

SUMMARY OF FINDING

For all 16 payments reviewed, totaling $489,046, the two hospitals billed NGS for the incorrect number of service units of oxaliplatin. As a result, the hospitals received overpayments totaling $433,112 during CY 2005. These overpayments occurred primarily because the hospitals did not update their systems following a change in Medicare billing guidance.

RECOMMENDATION

We recommend that NGS recover the $433,112 in overpayments to the hospitals.

NATIONAL GOVERNMENT SERVICES COMMENTS

In written comments on our draft report, NGS stated that it complied with our recommendation by recouping the overpayments from the providers. NGS’s comments appear in their entirety as the Appendix.

INTRODUCTION

BACKGROUND

Pursuant to Title XVIII of the Social Security Act, the Medicare program provides health insurance for people age 65 and over and those who are disabled or have permanent kidney disease. The Centers for Medicare & Medicaid Services (CMS) administers the program.

Medicare Fiscal Intermediaries

CMS contracts with fiscal intermediaries to, among other things, process and pay Medicare Part B claims submitted by hospital outpatient departments. The intermediaries’ responsibilities include determining reimbursement amounts, conducting reviews and audits, and safeguarding against fraud and abuse.1

Outpatient Prospective Payment System

Under the OPPS, Medicare pays for services on a rate-per-service basis using the ambulatory payment classification group to which each service is assigned. The OPPS uses the Healthcare Common Procedure Coding System (HCPCS) to identify and group services into an ambulatory payment classification group.

Oxaliplatin

Oxaliplatin is a chemotherapy drug used to treat colorectal cancer. During our audit period (calendar year (CY) 2005), Medicare required hospital outpatient departments to bill one service unit for every 5 milligrams of oxaliplatin administered.

National Government Services

National Government Services, Inc. (NGS) was the fiscal intermediary for West Virginia in CY 2005. During that period, the fiscal intermediary made a total of 1,466 payments to hospitals in West Virginia and Virginia for claims containing oxaliplatin.

---

OBJECTIVE, SCOPE, AND METHODOLOGY

Objective

Our objective was to determine, for selected payments, whether hospitals billed NGS for the correct number of service units of oxaliplatin.

Scope

We reviewed 16 payments totaling $489,046 that NGS made to two hospitals for oxaliplatin during CY 2005. Each of these payments amounted to less than $50,000.²

We did not review NGS’s internal controls applicable to the 16 payments because our objective did not require an understanding of controls over the submission and processing of claims. Our review allowed us to establish reasonable assurance of the authenticity and accuracy of the data obtained from the National Claims History file, but we did not assess the completeness of the file.

We conducted fieldwork from January through April 2009. Our fieldwork included contacting NGS, located in Indianapolis, Indiana, and the two hospitals that received the 16 payments.

Methodology

To accomplish our objective, we:

- reviewed applicable Medicare laws, regulations, and guidance;
- used CMS’s National Claims History file to identify the Medicare fiscal intermediaries that, during CY 2005, processed outpatient claims with a paid amount of less than $50,000 and a utilization level of 100 units or more of oxaliplatin;
- selected for review 16 outpatient claims paid by NGS in West Virginia with a paid amount of less than $50,000 and a utilization level of 100 units or more of oxaliplatin;³
- contacted the two hospitals that received the 16 payments to determine whether the service units were billed correctly and, if not, why the service units were billed incorrectly; and
- confirmed with NGS that overpayments occurred and refunds were appropriate.

²We limited our review to payments of less than $50,000 because payments of $50,000 or more are part of other audits.

³For materiality purposes, we excluded payments for claims with 100 or fewer units of oxaliplatin.
We conducted this performance audit in accordance with generally accepted government auditing standards. Those standards require that we plan and perform the audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objectives. We believe that the evidence obtained provides a reasonable basis for our findings and conclusions based on our audit objective.

FINDING AND RECOMMENDATION

For all 16 payments reviewed, totaling $489,046, the two hospitals billed NGS for the incorrect number of service units of oxaliplatin. As a result, the hospitals received overpayments totaling $433,112 during CY 2005. These overpayments occurred primarily because the hospitals did not update their systems following a change in Medicare billing guidance.

MEDICARE REQUIREMENTS

Section 9343(g) of the Omnibus Budget Reconciliation Act of 1986, P.L. No. 99-509, requires hospitals to report claims for outpatient services using HCPCS codes. CMS’s “Medicare Claims Processing Manual,” Pub. No. 100-04, chapter 4, section 20.4, states: “The definition of service units . . . is the number of times the service or procedure being reported was performed.” In addition, chapter 1, section 80.3.2.2, of this manual states: “In order to be processed correctly and promptly, a bill must be completed accurately.”

For outpatient services furnished before July 1, 2003, CMS instructed hospitals to bill for oxaliplatin using HCPCS code J3490. The service unit for that code was 0.5 milligrams.

Through CMS Transmittal A-03-051, Change Request 2771, dated June 13, 2003, CMS instructed hospital outpatient departments to bill for oxaliplatin using HCPCS code C9205 for services furnished on or after July 1, 2003. 4 The description for HCPCS code C9205 was “Injection, oxaliplatin, per 5 mg.” Therefore, for every 5 milligrams of oxaliplatin administered to a patient, hospital outpatient departments should have billed Medicare for one service unit during our audit period. 5

INCORRECT NUMBER OF SERVICE UNITS BILLED

During CY 2005, the two hospitals billed NGS for the incorrect number of service units on all 16 claims reviewed and, as a result, received overpayments totaling $433,112:

- For 14 overpayments totaling $389,704, one hospital billed 10 times the correct number of service units for oxaliplatin furnished to Medicare beneficiaries.

---

5 CMS instructed hospitals to bill for oxaliplatin using HCPCS code J9263 for services furnished on or after January 1, 2006 (70 Fed. Reg. 68516, 68632 (Nov. 10, 2005); CMS Transmittal 786, Change Request 4250 (Dec. 16, 2005)). The service unit for that code is 0.5 milligram.
For 2 overpayments totaling $43,408, the second hospital billed approximately 10 times the correct number of service units for oxaliplatin furnished to Medicare beneficiaries.

In both instances, rather than billing one service unit for every 5 milligrams of oxaliplatin administered, as Medicare required, hospitals billed one service unit for every 0.5 milligrams administered.

The overpayments occurred primarily because the hospitals did not update their systems following a change required by CMS Transmittal A-03-051.

**RECOMMENDATION**

We recommend that NGS recover the $433,112 in overpayments to the hospitals.

**NATIONAL GOVERNMENT SERVICES COMMENTS**

In written comments on our draft report, NGS stated that it complied with our recommendation by recouping the overpayments from the providers. NGS’s comments appear in their entirety as the Appendix.
APPENDIX: NATIONAL GOVERNMENT SERVICES COMMENTS

July 21, 2009

Mr. Peter J. Barbera
Office of Audit Services
61 Forsyth Street, S.W., Suite 3T41
Atlanta, GA 30303

Re: NGS Response to OIG audit A-04-09-06104 “Review of Outpatient Payments for Oxaliplatin in West Virginia.”

Dear Mr. Barbera:

This letter is in response to the draft report A-04-09-06104, entitled “Review of Medicare Outpatient Payments for Oxaliplatin in West Virginia”.

Oxaliplatin is a chemotherapy drug used to treat colorectal cancer. During the audit period, (calendar year (CY) 2005), Medicare required hospital outpatient departments to bill one service unit for every 5 milligrams of Oxaliplatin administered. National Government Services was the fiscal intermediary for West Virginia during this review period.

During this period, a total of 16 payments were reviewed on two hospitals totaling $489,046. According to your findings, the hospitals received overpayments totaling $433,112 during CY 2005. These overpayments occurred primarily because the hospitals did not update their systems following a change in Medicare guidance.

Your recommendation is that NGS recover $433,112 in overpayments made to these hospitals. NGS has complied with your request and as of 4/30/09 has recouped a total of $433,112 from these providers.

You may submit any additional questions and/or concerns to the NGS Medicare mailbox; ngs.medicare@anthem.com.

Sincerely,

Mr. David Crowley
Staff Vice President
Claims Management
